

*Achieve rapid performance improvement by eliminating waste, improving product flow, decreasing lead time, and increasing velocity in a customer-pulled process.*

## **IQPM Consulting Lean Offering Services**

### **Delivering sustainable performance improvements**

IQPM Co. is an established consulting company focused on business performance improvement. Amongst our core capabilities, we offer a range of Lean consulting services which include the following:

#### **Value Stream Transformation**

For clients wishing to achieve rapid transformation of a specific value stream, this workshop-cum-training program enables participants to learn and apply key concepts of the Lean methodology. You will create current- and future-state Value Stream Maps and set up Charters for the projects that will deliver the Lean transformation. The bias to action enables the Value Stream Transformation to deliver results quickly, while the engagement of your own people strengthens their skill base for results that last.

#### **Fast Start to Lean**

This is a foundation-building program that offers a fast and effective way of achieving a stable, safe and efficient operation. Designed specifically for an industrial environment that is new to the Lean approach, Fast Start to Lean involves a hands-on approach to learning and applying Lean techniques. Using tools such as Standard Work, Total Productive Maintenance and Visual Workplace, we will help your employees to transform the effectiveness and efficiency of the working environment in less than two months.

#### **Lean Practitioner and Lean Expert**

The two-week Lean Practitioner and four-week Lean Expert programs give clients an even more comprehensive understanding of the Lean methodology and are well suited to situations where waste and lead time reduction are a company's key priority. The courses prepare participants to apply Lean to their own work processes. Lean Practitioners can become part-time leaders of carefully scoped improvements while Lean Experts can undertake complex programs requiring project selection, management and team leadership skills.

#### **Lean Master**

The Lean Master is a progression from the Lean Practitioner and Lean Expert where IQPM Professionals works with key individuals selected to become company-wide leaders capable of designing value stream transformation programs and performing the training and coaching needed to implement them. We work alongside these individuals in the key areas where they need support and guidance until they have the capability and confidence to take full control.

*Achieve rapid performance improvement by eliminating waste, improving product flow, decreasing lead time, and increasing velocity in a customer-pulled process.*

### **Lean Six Sigma Offering**

#### **Experience and Depth that Counts**

##### **Lean Booster**

Supercharge Lean with Six Sigma via innovative tools to eliminate waste and generate continuous flow through the entire value stream. Lean Booster is a one-week fast-track program designed to bring Lean Six Sigma to organizations with a well-established Six Sigma program with no need to start from scratch. Lean Booster follows the DMAIC steps, and applies to both services and manufacturing. Lean Booster participants get a strong baseline via the most progressive breakthrough approach to Lean Six Sigma available today.

Our clients select either the one-week Lean Booster course or the two-week Lean Practitioner course. Both courses show participants how to

- Develop a working knowledge of Lean Six Sigma principles, design practices, and tools, including Value Stream Mapping.
- Understand the ways in which Lean and Six Sigma complement each other.
- Develop systematic methods for applying Lean design practices and tools.
- Practice with the tools.
- Gain working knowledge of your company's strategy for Lean Six Sigma.

##### **Lean Six Sigma Green Belt**

Green Belts learn Lean Six Sigma methodology and gain experience with Lean Six Sigma tools in this fast-paced course. This develops the capability to lead appropriate projects for the skill and leadership level and to participate effectively in Lean Six Sigma projects. A 2-week version for services or manufacturing and a 3-week version for manufacturing is available.

##### **Lean Six Sigma Black Belt**

In-depth training for Black Belts in Lean Six Sigma's integrated toolkit results in rapid performance improvement in cost, quality, speed, and service levels. A 4-week version for services and manufacturing is available. This can also include a unique Team & Influencing Skills for an additional week.

##### **Integrated Lean Six Sigma Roadmap**

IQPM Co.'s Integrated Lean Six Sigma Road Map will take you step by step in developing your Project Plan and to show you and your team members how to use Six Sigma tools to eliminate variation and Lean tools to create flow.
